

Statement on Real or Perceived Conflicts of Interest for Authors

Information pertaining to *all* authors must be entered on this form

Science has a primary responsibility to its readers and to the public to provide in its pages clear and unbiased scientific results and analyses. Although we rely on the expertise of our Board of Reviewing Editors and our peer reviewers to help us accomplish this, we think that our readers should be informed of additional relationships of our authors that could pose a conflict of interest. Thus, for readers to evaluate the data and opinions presented in *Science*, they must be informed of financial and other interests of our authors that may be at odds with unbiased presentation of data or analysis.

Therefore, *Science* believes that manuscripts (Brevia, Essays, Perspectives, Policy Forums, Reports, Research Articles, Reviews, and Viewpoints) should be accompanied by clear disclosures from all authors of their affiliations, funding sources, or financial holdings that might raise questions about possible sources of bias. Disclosure is accomplished in three ways:

First, by a complete listing of the current institutional affiliations of the authors.

This list must include academic as well as corporate and other industrial affiliations. As the editors deem appropriate, items in this list will be included in the author affiliations printed in the manuscript. Please indicate below:

- All affiliations of all authors are listed on the title page of the paper.
- Additional affiliations not on the title page are:

Second, through the acknowledgment of all financial contributions to the work being reported, including contributions “in kind.” All funding sources will be listed in the published manuscript. Please indicate below:

- All funding sources for this study are listed in the acknowledgement section of the paper.
- Additional funding sources not noted in the manuscript are:

Third, through the execution of a statement disclosing to the Editors all financial holdings, professional affiliations, advisory positions, board memberships, patent holdings and the like that might bear a relationship to the subject matter of the contribution. The Editors will determine whether the material disclosed to them should be published as part of the article. Please check the appropriate box below:

The following are declarable relationships:

Financial: Significant financial interest (equity holdings or stock options) in any corporate entity dealing with the material or the subject matter of this contribution. Please disclose the entity and the nature and amount of the holding.

- None
- One or more authors has a financial relationship, as described below.

Management/Advisory affiliations: Within the last 3 years, status as an officer, a member of the Board, or a member of an Advisory Committee of any entity engaged in activity related to the subject matter of this contribution. Please disclose the nature of these relationships and the financial arrangements.

- None
- One or more authors has a management/advisory relationship, as described below

Paid Consulting: Within the last 3 years, receipt of consulting fees, honoraria, speaking fees, or expert testimony fees from entities that have a financial interest in the results and materials of this study. Please enumerate.

- None
- One or more authors has a paid consulting relationship, as described below

Patents: A planned, pending, or awarded patent on this work by any of the authors or their institutions. Please explain.

- None
- One or more authors or the authors' institutions has a patent related to this work, as described below

- All authors declare that we have read Science's full Conflict of Interest Policy and have disclosed all declarable relationships as defined therein, if any.
