

## AAAS/*Science* Family of e-Resources now Indexed in Ex Libris Primo Central

November 2010

Washington, D.C., Jerusalem, Israel: The American Association for the Advancement of Science (AAAS), publisher of the journal *Science*, has partnered with Ex Libris Group to provide integrated access to its online content via Ex Libris' Primo Central Publisher Program. Full-text articles from the journals *Science*, *Science Signaling*, and *Science Translational Medicine* are now indexed in Primo Central. AAAS joins several of the leading information providers that have contributed their content for indexing to the Primo Central index of scholarly materials, thus enhancing the discoverability of their content by the research community.

"We are very pleased to enter this collaboration with AAAS, offering library users at institutions that license AAAS' online content, fast, effective, and seamless access to the important scholarly content of the journal *Science* and its sister publications," remarked Nancy Dushkin, Corporate Vice President of Discovery and Delivery Solutions at Ex Libris. "We are delighted to include AAAS in the rapidly growing number of content providers who are partnering with Primo Central to enhance user access to their resources included in the library's offerings.

"It is very important to us at AAAS that the scientific literature published in our electronic resources are discoverable by the research community through a variety of Web-Scale Discovery services and Ex Libris is one of the leading providers in this area," Tom Ryan, Director at AAAS, explained. "We are excited about the implementation of these new Web-Scale Indexes, which enhances the end users' experience by empowering them with the best discovery tools available. The realization of a single index for end users to discover our scientific content is definitely a step in the right direction. We are confident our partnership with Primo Central is an example of this evolutionary progression."

The AAAS/*Science* family of e-resources includes *Science* which provides access to high-impact research and breaking science news from around the world; *Science Signaling*, the most up-to-date essential research and commentary in the dynamic field of cellular signaling; and the newest addition to the family, *Science Translational Medicine*, which focuses on the emergence of personalized diagnosis and treatment to increase the strengths of experimental results.
