* CMS Active Hospitals as of 9/13 N=6,066, excluding hospital subtypes of Nonparticipating Hospital, Transplant Hospital, and Religious NonMedical Institutions

Summary

- 24.3% of the facilities reported all metrics every day between September 14-September 20
- Daily reporting of all metrics vary by jurisdiction. Only four jurisdictions reported in between 60 and 70% of all metrics every day for the time period September 14-September 20.
- Supply data elements are the least frequently reported—increased reporting compliance expected from:
 - CMS rule implementation
 - Decrease in required reporting frequency to once a week
- Next steps:
 - Assist states to overcome challenges to required reporting of hospital data
 - Continue quality and completeness assessments and comparisons to data after CMS final rule implementation to prioritize further outreach
