JOURNAL SCOPE

Translational research that matters for human health, connecting biomedical research at the bench to clinical applications at the bedside.

- Studies in humans or human tissue that provide new information about therapies or disease.
- Results from animal models that apply to patients.
- Reports on innovative drug discovery and device development.

PUBLICATION FEATURES

- Full-length original **Research Articles**.
- **Reviews** identify the challenges blocking translation and propose innovative solutions.
- **Focus** articles and **Perspectives** present topical opinions from science and policy leaders.
