Yes—information on MTA's is described below.

IV. Conflict of Interest:

Science has a primary responsibility to its readers and to the public to provide in its pages clear and unbiased scientific results and analyses. We think that our readers should be informed of additional relationships of our authors that could pose a conflict of interest. Thus, for readers to evaluate the data and opinions presented in *Science*, they must be informed of financial and other interests of our authors that may be at odds with unbiased presentation of data or analysis.

Therefore, *Science* believes that manuscripts (Brevia, Essays, Perspectives, Policy Forums, Reports, Research Articles, Reviews, and Viewpoints) should be accompanied by clear disclosures from all authors of their affiliations, funding sources, or financial holdings that might raise questions about possible sources of bias. Disclosure is accomplished in three ways:

Third, through the execution of a statement disclosing to the Editors all financial holdings, professional affiliations, advisory positions, board memberships, patent holdings and the like that might bear a relationship to the subject matter of the contribution.
