To: William B Hurlbut <[REDACTED]>

hi Bill,

The article in STAT is quite good. The only thing I do not like is the title "I am actually doing very well". The readers may think I am happy and satisfied with what I have done. I have been thinking those days. I recognize I pushed too quickly into a first-of-kind clinical study without the necessary open dialog with regulators, the scientific community, and the public.

Regards,
JK
